

Available sites for large scale turbines

VIVA can offer prepared sites for testing and demonstration of large scale wind turbines at the Norwegian coast near the university city of Trondheim.

- ✓ Sites ready for turbine installation
- ✓ Good wind conditions
- ✓ Easy road and sea access with deep water quay
- ✓ Shore location simulating offshore conditions
- ✓ Established service infrastructure

VIVA offers infrastructure and services for test and demonstration of components and full scale solutions for wind power production. The facilities can be used for education, research and industry purposes. SINTEF Energy Research, Institute for Energy Technology (IFE) and the Norwegian University of Science and Technology (NTNU) are co-owners and partners sponsoring the test centre.
